

I had been getting phone calls from telemarketers from the time I get home at night (4:30 pm) till I go to bed at 10:00 pm. How frustrating it had been to try and have a nice quiet, family meal only to be interrupted by numerous phone calls. I found that if I didn't answer the phone, they don't leave a message just continue to call back. The Do Not Call List has made a HUGE difference with the amount of phone calls I receive from telemarketers. They now are very few. I will be outraged if this changes.

Please keeping the Do Not Call List the way it is!
